Sounds good - hopefully we have worked all the comms bugs out. I keep forgetting that OSCs are blessed with all kinds of devices such as BBs and sat phones. In the 9 years I worked for Delaware Dept of Natural Resources we had 3 phones for 20+ of us!

Hi Ann,

The Scranton's Oil & Gas Office's secretary would probably be the person to e-mail if you cannot get in touch with me, since she is always in the office. Her name is Alice Adams and her e-mail is [aliadams@pa.gov](mailto:aliadams@pa.gov) I will try my best to check my e-mails as often as I can, when I can. I will reply to all cc'd on it to acknowledge my receipt of it. The e-mail in question (below) I did receive on my computer, but it was sent while I was clearly in the field sampling. As follows:

It would be helpful to also have on-site confirmation of such notifications between all parties, since we're all there together anyway.

Thank you,

Hi Stephen -

Just checking to see if you received this email - I understand that you may have not received the notification. We will make sure that we follow up with a phone call in the event that we have any changes in the future. It also may be useful if you could send me a contact email for someone in the office that I could get a hold of in the event that you are out of cell phone reach.

I also understand that you had inquired about our plans for surface water sampling. We have not finalized our plans for surface water sampling locations at this time - if any sampling is conducted. We will make sure that we discuss any plans with you (and Cabot) well in advance of any decisions being made on this matter. Thank you - Ann
